How does Six Sigma help?

NeST Six Sigma Consultancy

Reasons

- > Globalisation
- > Innovative technologies
- > Regulations

Symptoms

- > Increasingly ungovernable
- > Unwieldy

Results

- > Declining performance
- > Unclear accountability
- > Vague decision rights
- > Excessive processing of data
- > Unclear purpose

Six Sigma is about Operational Excellence. When all aspects of an organization - software development, business development, customer service, sales, marketing, management, innovation - are each operating at their best and in support with each other, operational excellence results and this is what Six Sigma aims to achieve.

Six Sigma seeks to improve process performance by reducing variation leading to:

- Greater predictability in the process
- Less waste and rework, lowering costs
- Products and services that perform better and last longer
- Happier customers

The focus is on identifying root cause of problems and developing solutions to prevent them from happening again. Thus,

Six Sigma is a Business Requirement !

How is Six Sigma different from other quality initiatives?

- A clear focus on achieving measurable and quantifiable financial returns from any Six Sigma project.
- A clear commitment to making decisions on the basis of verifiable data, rather than assumptions and guesswork.
